

SEEN AT 11:43

Genre: Serialized Mystery / Drama • Format: Mobile-First Episodic Series • Sample: Series Concept

Series Concept

LOGLINE

When 27-year-old Maya begins receiving anonymous messages that predict events before they happen, she follows the clues into a family secret that someone is desperate to keep buried.

SERIES ENGINE

Each episode moves through four beats: Question → Discovery → Complication → New Question. The mystery keeps expanding while Maya's relationships become harder to trust.

MAIN CHARACTER

Maya — observant, stubborn and emotionally guarded. She wants answers, but every answer forces her to reconsider what she thought she knew about the people closest to her.

KEY CHARACTER

Daniel — Maya's older brother. Protective on the surface, increasingly difficult to read as the messages reveal that he may know more than he admits.

EPISODE PROGRESSION

1. THE MESSAGE — Maya receives the first warning and is told to ask Daniel where he was at 11:43.
2. 11:43 — Maya discovers Daniel's story doesn't match what another person remembers.
3. THE PHOTO — A photograph appears that places someone unexpected at the center of Friday night's mystery.
4. THE VOICE — Maya receives an audio message from a source who refuses to reveal their identity.
5. THE LIE — Daniel admits one thing he has been hiding, but it isn't the secret Maya expected.
6. FIVE MINUTES — Maya finally discovers why 11:43 matters—and realizes the person sending the messages may be much closer than she thought.

MOBILE-FIRST STORYTELLING

The concept is designed for short episodes with immediate hooks, compact scenes, visual reveals, tight dialogue, escalating questions and strong episode endings. Each episode should leave the viewer with a reason to tap into the next one.
